FAQ

Q: The keyboard doesn't respond properly?

A: Please check if the keyboard's interface is plugged securely into the USB port on the computer or try to plug the keyboard into another free USB port on the computer.

Q: What if water gets into the keyboard?

A: Please unfold the feet at the back of the keyboard and tilt the keyboard to keep water from getting into the printed circuit board (PCB), and it will run out through the drain holes at the back. Doing so prevents water staying inside the keyboard.
