

# INFLATABLE COSTUME

Congratulations on the purchase of this costume! Good fun and enjoyment will be **GUARANTEED!**

Please read these instructions before using!

## Manual

You need 4 AA batteries (not included).

1. Remove all the packing-material from the costume and the battery-compartment.
2. Insert the 4 AA batteries into battery-compartment as instructed.
3. Attach the battery-compartment to your belt by using the clip.
4. Step into the costume and connect the cable of the fan with the battery-compartment. Turn the switch at the battery-compartment to ON. With new batteries correctly inserted the fan can now be heard to work.
5. Now close zip and pull cords tightly on head, arms and legs. Within 30 to 60 seconds the costume will be fully inflated. While the costume is being worn the fan should be running constantly. If good batteries are used the fan will run between 6 to 7 hours.
6. Loss of pressure during movements is normal and will be regulated by the fan.

Usage of the Batteries:

1. Please do not try to re-charge batteries which are not meant to be.
2. Re-chargable batteries must be taken out of the battery-compartment for the process of re-charging.
3. Children must be supervised at all times when handling batteries.
4. Do not mix battery-types e.g. alkaline with standard (carbon-zink) or re-chargable (nickel-cadmium) batteries.
5. Only use batteries of same quality.
6. Ensure that you have inserted the batteries with the correct polarity.
7. Empty or used batteries must be removed from the batterie-compartment.
8. Return used batteries to authorized shops only. **DO NOT DISCARD INTO NORMAL HOUSEHOLD WASTE!**
9. Never throw batteries into fire. They could leak or explode!!!

### WARNING:

Remove all packing material! Never pull plastic bag over head - danger of SUFFOCATING!!! Keep costume away from heat - especially from open fire!!!

Wash costume by hand in cold water only!
